Besides, we have monthly scientific conferences and workshops; inviting distinguished speakers cooperating with Mayo clinic and other international scientific centers.

This meeting is going to be holding with the work of a large group of our colleagues in the faculty and executive committees, and we hope that it will be an environment to rest in companion with your friends as well as a fruitful scientific event. We have invited an outstanding group of guest speakers from other countries and Iranian colleagues residing outside the country who have close relations with the societies. Herein, we would like to welcome our guests and thank them for re-joining us and promoting the scientific content of our meeting.

We would like to express my deep gratitude to the scientific and executive committees of the congress and the companies whose support has been of great help for the Iranian Society. Secretary-General Message

Dear Colleagues,

We are pleased to announce the “16th International Congress of Nephrology, Dialysis, and Transplantation.” held by Iranian Society of Nephrology on 16-19 May 2017. Our previous experience in the previous meetings has encouraged us to gather again and plan another memorable program for the members of the Iranian Society of Nephrology and all respected guests form the region and the world.

Our attempt is to provide diverse programs and to accomplish our mission to furnish an atmosphere suitable for presentations of the outcomes’ activities during the past 10 scientific years. This would be a good opportunity to share our experiences with our friends in the region and learn from the colleagues who will come to Iran from all over the world. The main important issues we are involved with in the field of nephrology will be discussed during this congress and the main topics are selected according to the expectations and needs of the nephrologists working in Iran and the region. We are eagerly looking forward for receiving your valuable papers to be presented in Shiraz, cultural capital of Iran (city of poets and gardens). Please join us for a unique international congress in the Middle East and share the critical medical information and ideas with us at this meeting.
