THE PEER REVIEW PROCESS

The peer review process

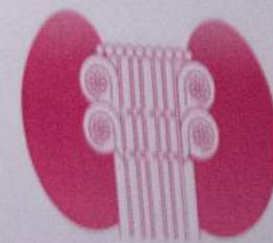

Points to note:

A final decision may be made after one round of review

Most manuscripts go through at least one round of revision before publication

Revision does not guarantee acceptance

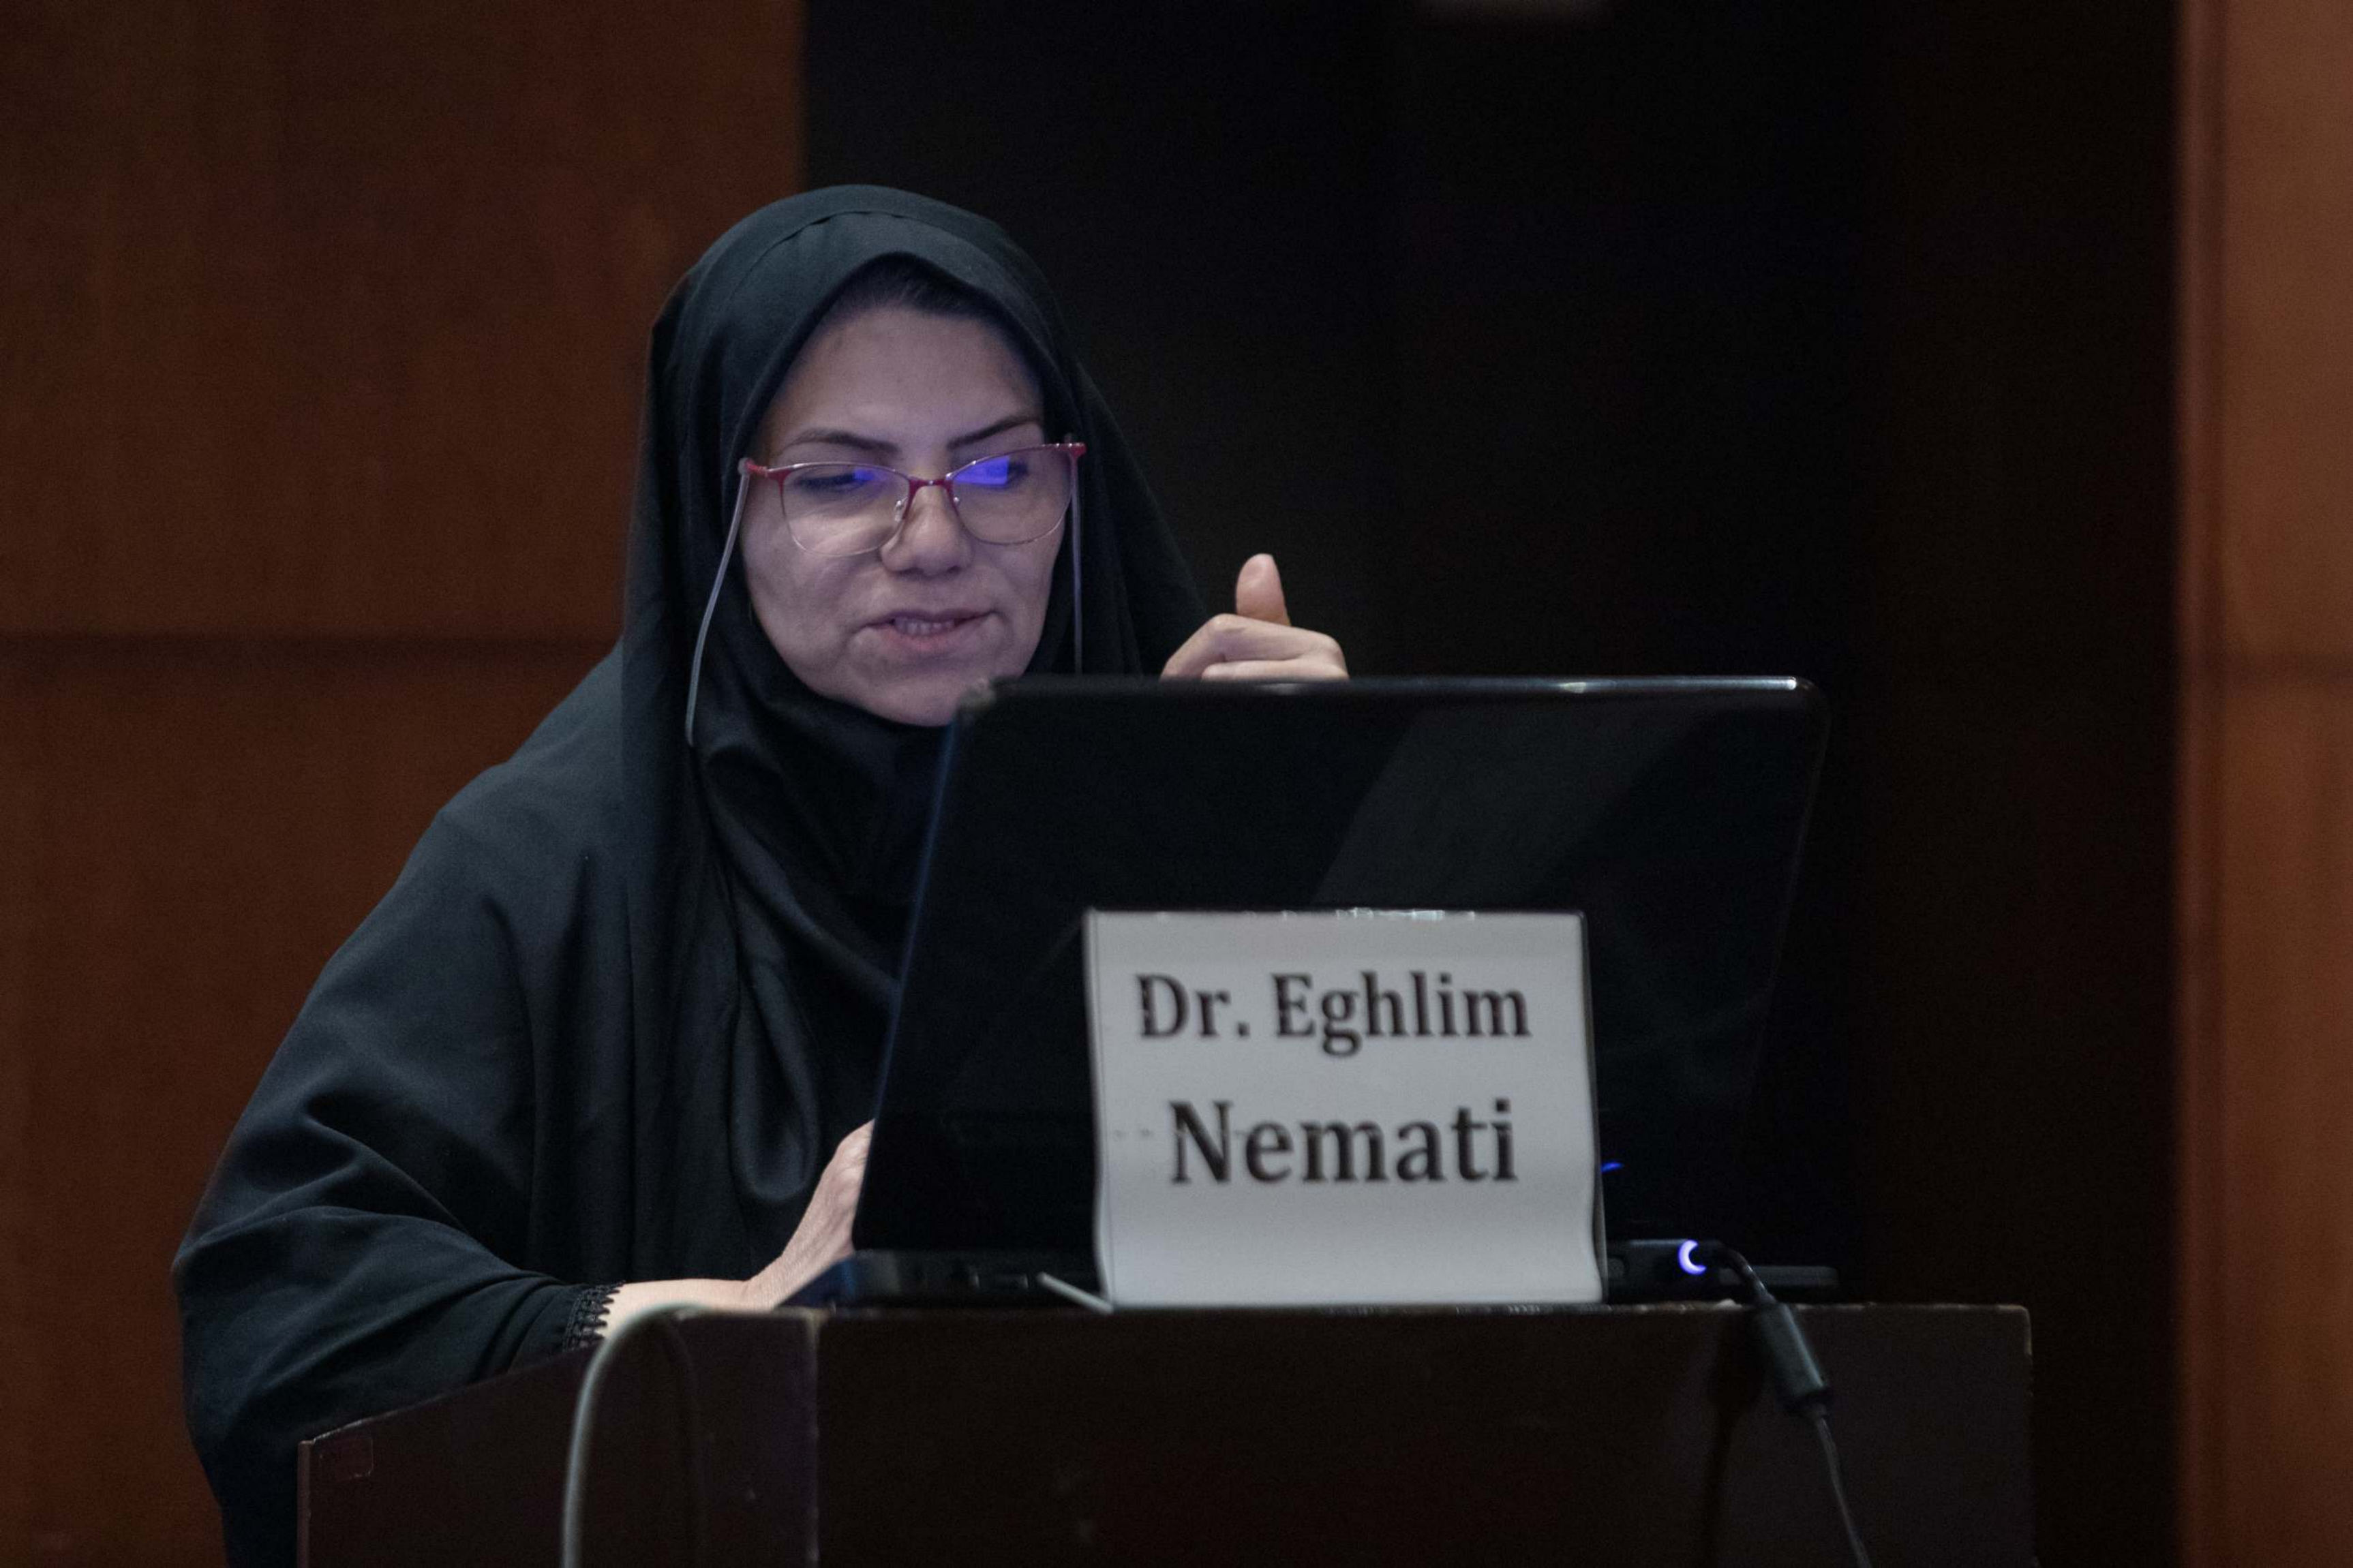

Iranian Society of Nephrology

The **19th**
International Congress

A woman wearing a black hijab and red-rimmed glasses is speaking at a dark wooden podium. She is looking down at a laptop screen in front of her, with her right hand raised in a gesture. A nameplate on the podium identifies her as Dr. Eghlim Nemati. The background is dark and out of focus.

**Dr. Eghlim
Nemati**

Pauci-Immune Proliferative Extracapillary GN

- Approximately 90% of patients with pauci-crescentic GN have ANCA.
- Cases of idiopathic crescentic GN not associated with ANCA, immune complexes nor anti-GBM are very rare (approximately 5%).
- Pauci-immune crescentic GN is the most frequent cause of rapidly progressive GN and the pulmonary hemorrhage syndrome.
- The differential diagnosis in crescentic pauci-immune GN is: Wegener's granulomatosis, microscopic polyangiitis, Churg-Strauss syndrome, and idiopathic crescentic GN.

Stable ICU Patients with AKI-D

- stable hemodynamics
- stable respiratory function
- balanced fluid status
- no impending renal insult

Urine output

- without diuretics: 400 - 1000 ml/24 h
- on diuretics: 2000 ml/24 h

Creatinine clearance (24 hour or 4-6 hour)

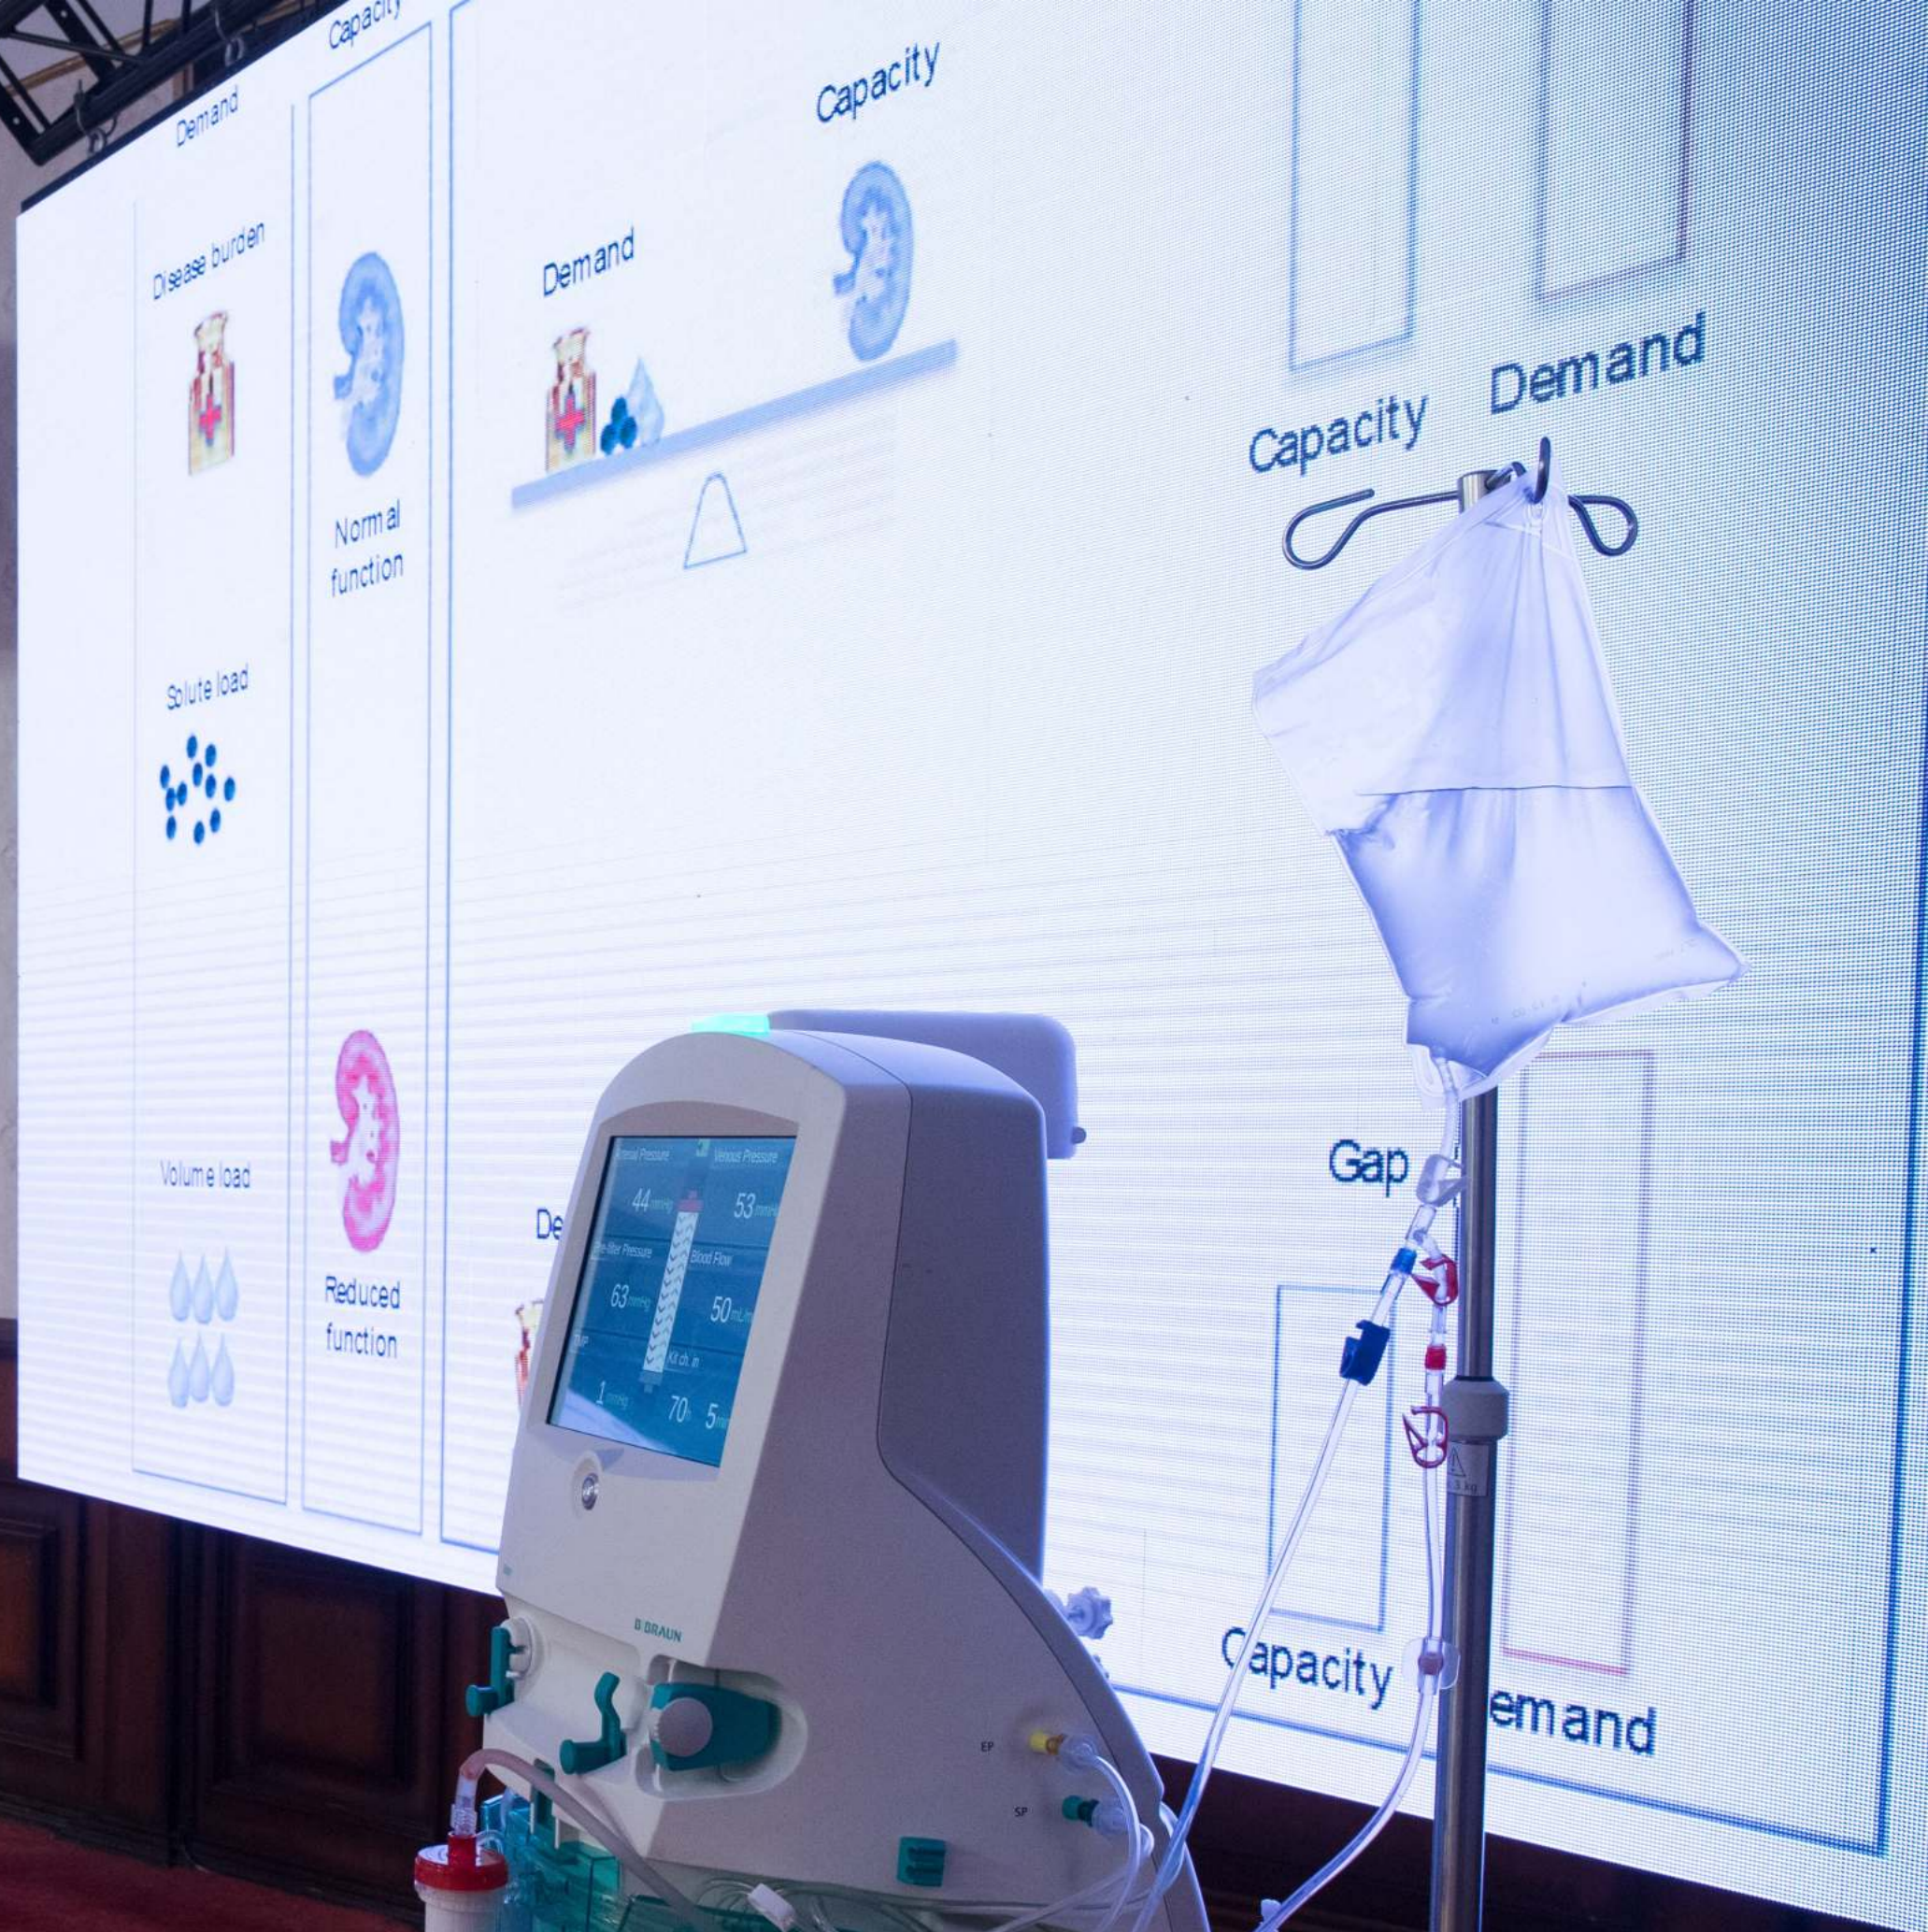

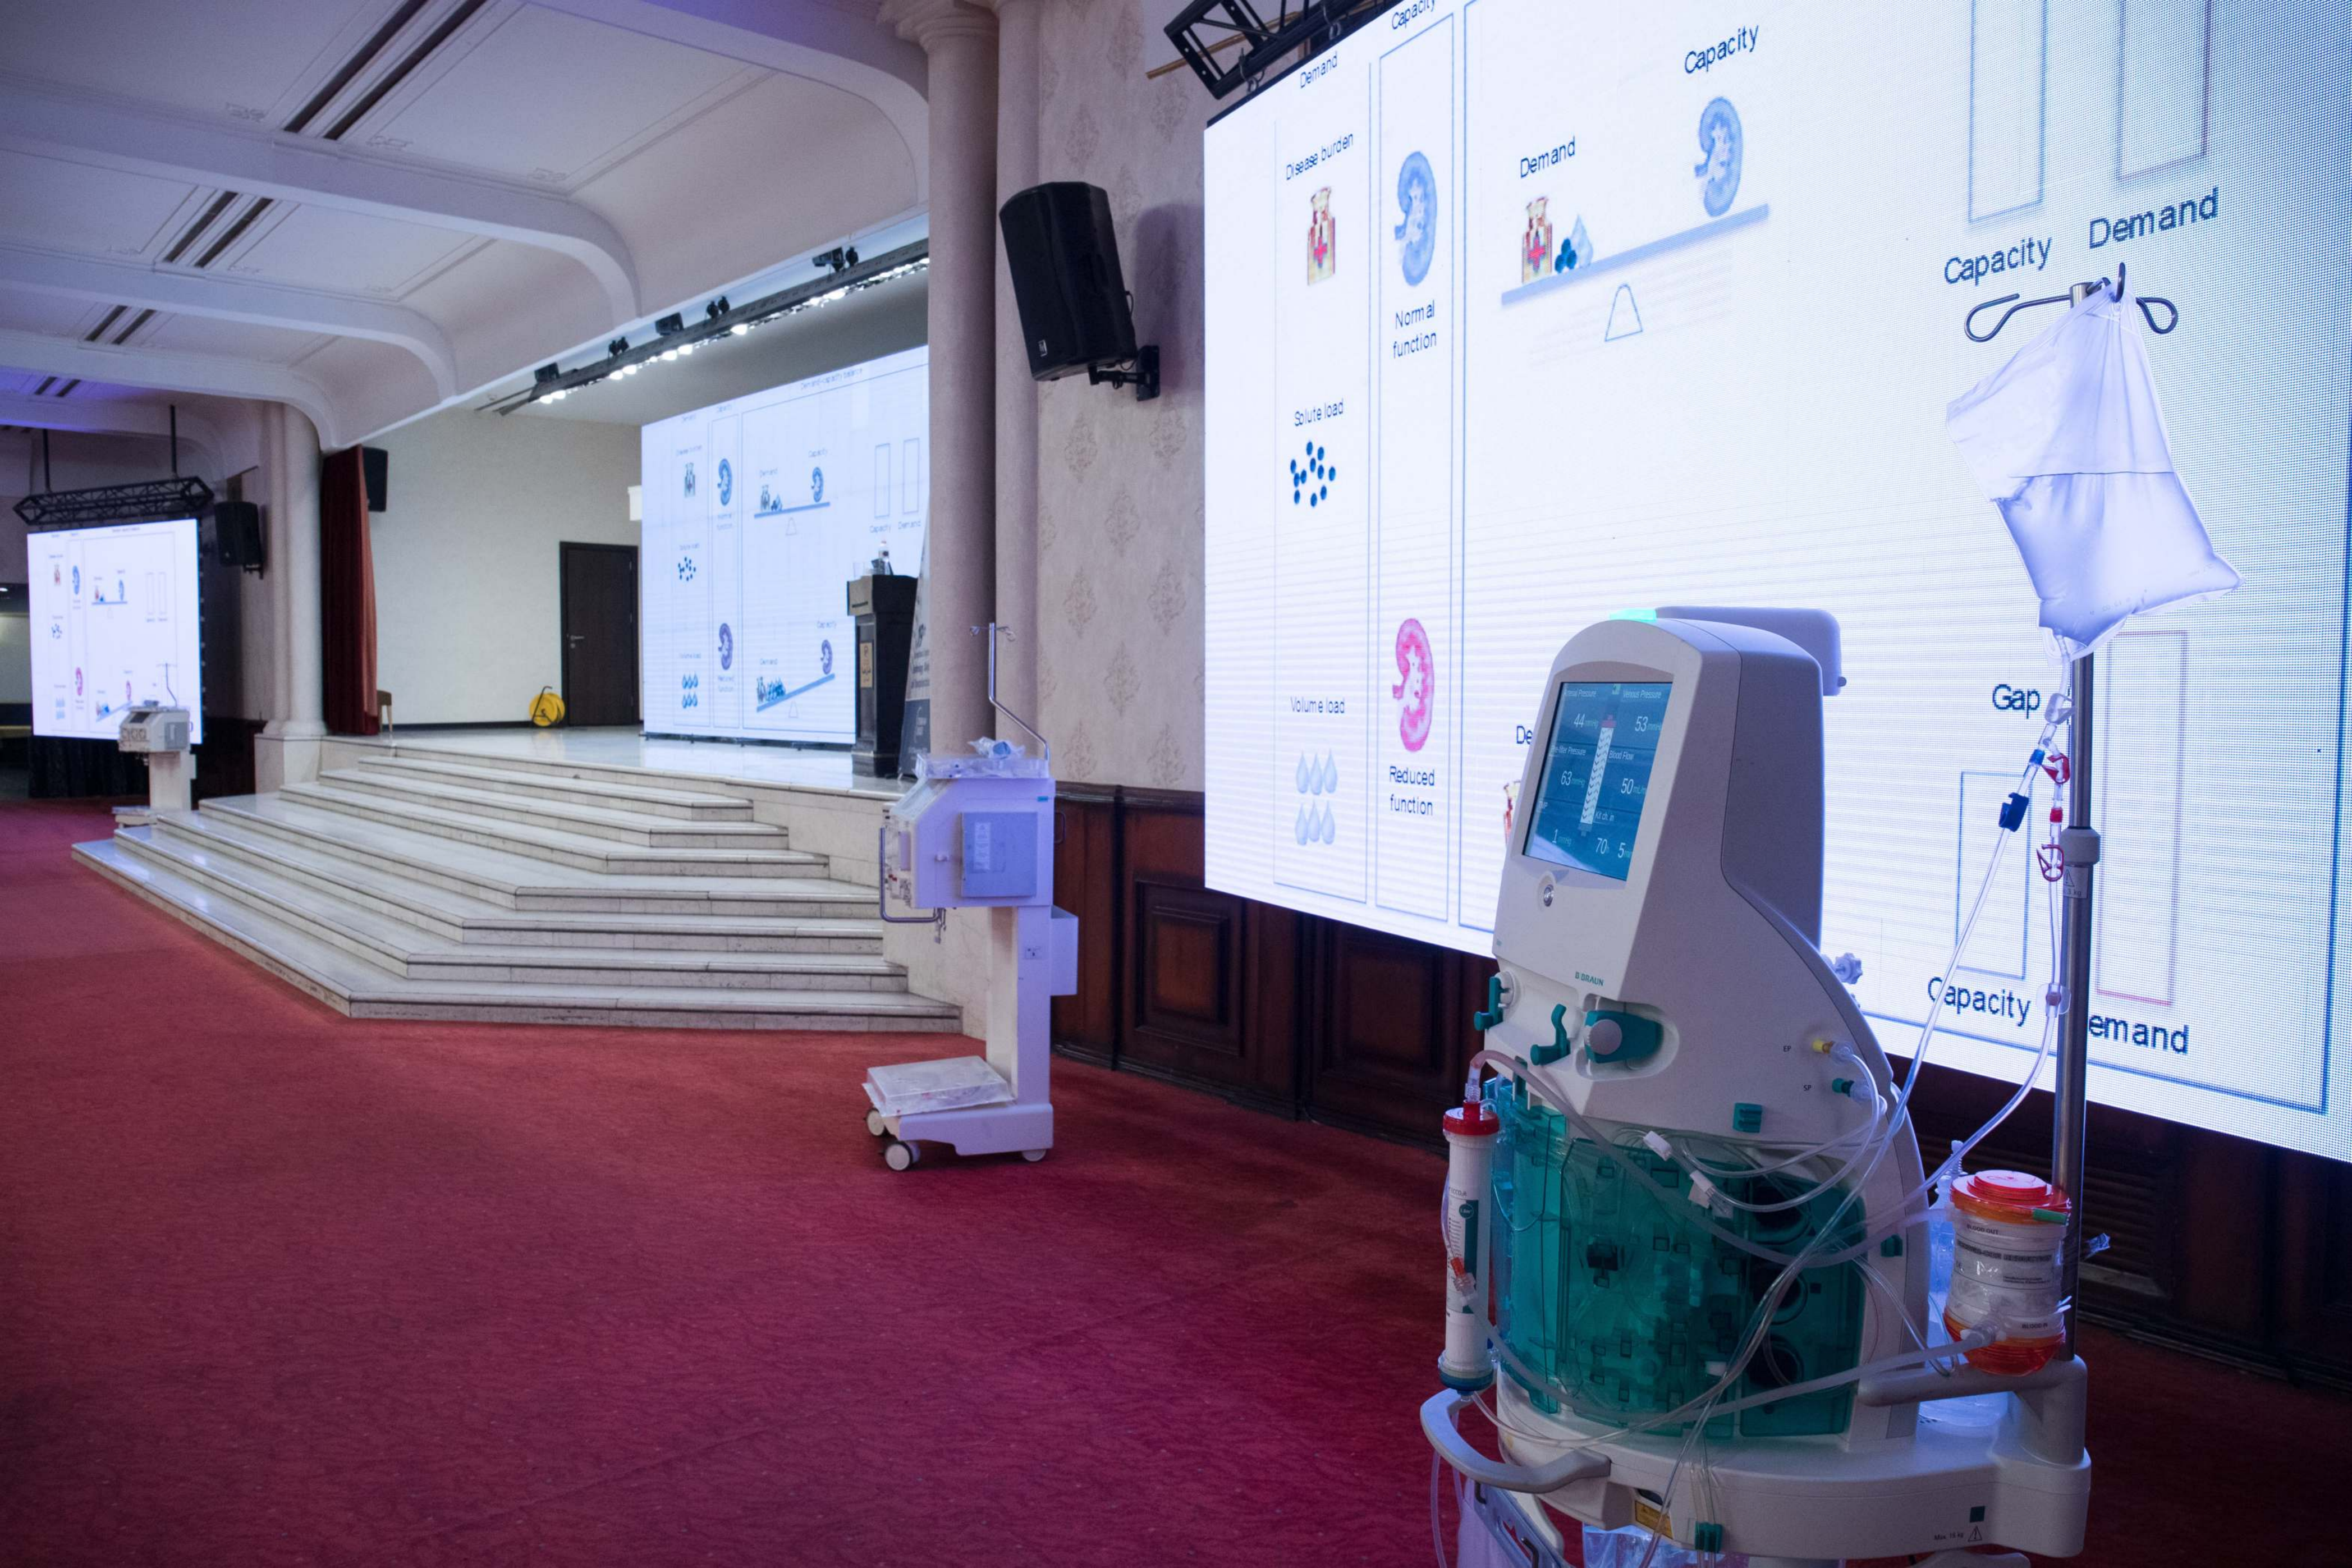

15-20 ml/min and
a spontaneous decrease in serum creatinine

Weaning attempt of acute RRT
